DETAILED ACTION

Allowable Subject Matter

1. Claims 22-29 and 31-33 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art teaches the invention essentially as claimed but does not teach separate leveling and stirring squeegees. See Asai and Fogal. Neither does the prior art teach a step of detecting the height of the viscous fluid before transfer. Typically the height distance between the nozzle and viscous fluid is determined. The closest prior art indirectly measures the height of the fluid during transfer by measuring the height of the nozzle and detecting proximity to the bottom of the fluid container during immersion rather than before. See Arikado. By measuring the height of the fluid, the amount of fluid transferred can be set with high precision without risk of damaging the component.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Onishi et al. (US 2004/0035306 A1, multiple squeegees).
